Exotic Hybrids were developed with only one purpose in mind, that more flowers to be used by more people in their homes. These spikes are not long and some varieties crook considerably, for example, Sister Kenny has eight long lacy petals per floret, spikes supported by long thin stems bending to the ground, outstanding in form and color to be a patented variety.

Most "Exotic Hybrids" have double florets, with as many as thirty petals making a fullness ideal for floral work no other Glad can equal.
